

Learner scenario persona

Aaron

Aaron is in year 11, and got a 3 in most recent Maths GCSE assessment. Knows he needs to pass to go to college to do construction or photography but **struggles with focus in class, and doesn't know any techniques for revision.**

Problem statement

I struggle to concentrate in Maths, and don't know how to revise.

My needs

- Get motivated
- Understand revision techniques
- Focused support understanding the more difficult topics

Current grade

3

Target grade

5

How MyTutor can help

Setting the scene

Who?	When?	Why?
Aaron	End of January, after most recent formative assessment	To get motivated to engage in Maths, and learn some ways to improve studying alone and revision

School context

Aaron is targeting a 5, and knows he needs that to get into college, so has some motivation to try support offered to him.

He's currently on a 3, which has alerted the school to his needs, and the risk of him failing Maths altogether.

His school really want to help him get the pass they think he can achieve, and know he's likely to engage with support, so are willing to fund some help from MyTutor.

Commercial context

- Aaron's school bought MyTutor membership at the start of the academic year.
- They can access some support for free with it.
- They can recommend some learners for additional support, which might require further payment depending on the level of support.

Key moments

1

Formative assessment results still low, and a way off target grade of 5 to get into college

Teacher highlights Aaron as needing extra help.
Senior staff/PL selects him for MyTutor support

Key assumptions

A pupil like Aaron wouldn't already be receiving support

2

Test that identifies where he needs help

He can take photo of recent test paper and we can diagnose where he needs help.
Complete self-assessment.

Key assumptions

There would be detail in the marking of the test that shows areas Aaron needs help with.
Tests are marked and returned to pupils soon after doing them.

3

Plan generated that schedules 1:1 tutoring, highlights topics to focus on, links to streams and a revision schedule up to exam.

Aaron gets a schedule of 1:1 tuition ready to start.
Aaron can see what he needs to revise and what's available to help.
Sees where he can watch recordings vs. attend live.

Key assumptions

A pupil like Aaron would benefit from and engage with a plan for revising alone.

4

Has his first 1:1 session

Sees who his tutor is and a bit about them before the session.

Tutor uses the plan and self-assessment results to structure lesson.

Tutor reviews plan after first session to update if needed

Key assumptions**5**

Joins a large group stream on revision techniques, with practical examples of revision techniques worked through with real Maths topics

6**Continues 1:1 to exams**

Weekly 1:1 sessions with the same tutor.

Progress visible leading up to GCSE - in past paper results, practice exam q's etc., making Aaron feel more confident in his ability.

Teacher can see this progress too, in their MyT account
