

Product vision / strategy

Last update Oct 2023

The background is a solid dark gray. In the top right corner, there is a teal-colored geometric shape, possibly a trapezoid or a portion of a larger polygon, with white lines forming a grid pattern inside it. In the bottom left corner, there is an orange-colored geometric shape, also a portion of a larger polygon, with several thin red lines drawn across it in a sketchy, hand-drawn style.

Life-changing learning for all

Putting our learners at the center

The education system has significant gaps

Schools are over-stretched and unable to offer the individual attention it takes to ensure no student gets left behind.

Small learning gaps of today can grow into significant issues tomorrow.

Life changing learning for all

MyTutor believes that every learner deserves quality education.

We diagnose and fill those learning gaps, providing anyone with the inspiration, motivation and support they need to achieve a better future.

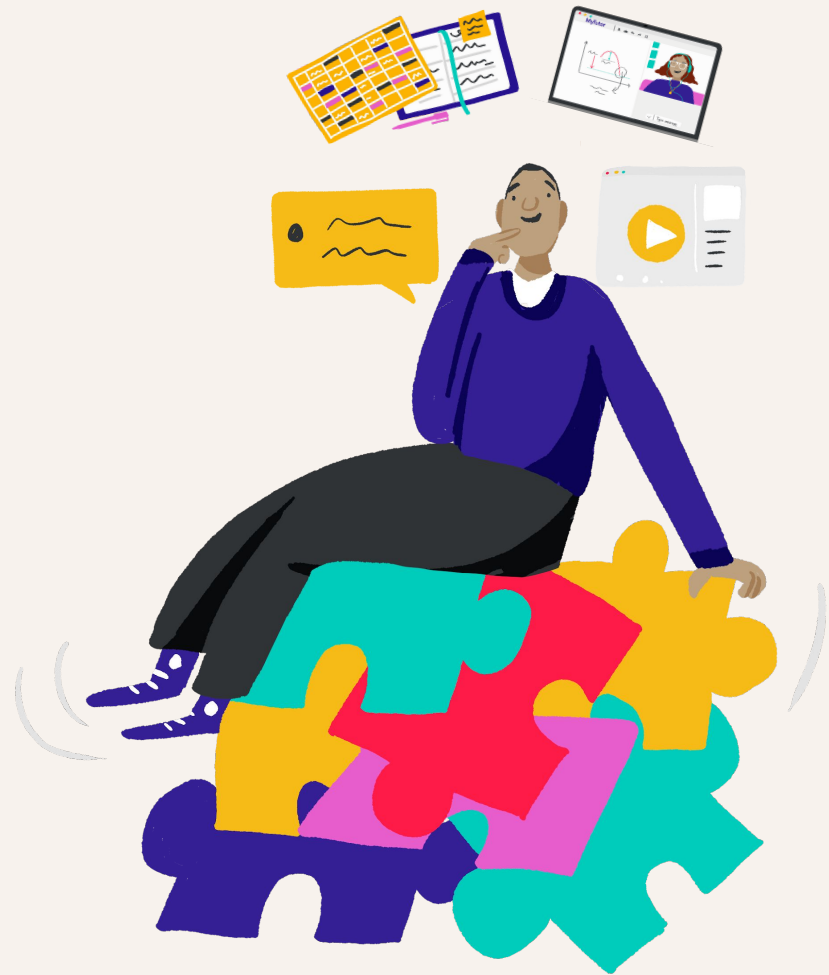

What got us here, won't get us there ...

Tutoring really works, is core to who we are

But we are a long way from our vision of impacting 1 million lives.

We need a more radical approach to reach new learners, more cost effectively, helping them to fill those gaps and reach their potential.

A tutor-powered learning hub

We blend the best of near-peer tutoring with the power of technology (& AI) to support learners in cost-effective and high impact ways.

Providing learners with flexible tutoring and high-quality, self-guided learning tools at their moment of need.

Built on a deep understanding of our learners' needs

Our data-centred approach creates an evolving picture of each learner's needs and progress.

We use this to adapt what we offer, to target greatest areas of need, and drive engagement.

Connecting home and school learning

By partnering with schools to engage parents (and teachers) we nurture a community of support, build a defensible ecosystem AND subsidise those most in need.

- *Parents: gain insights from school*
- *Teachers: support more learners for less*
- *Schools: earn free tutoring credits*

Leading to a step-change for our customers

For families

higher impact at
lower cost per hour
of learning

For schools

serving larger year
groups, aligning with
parents

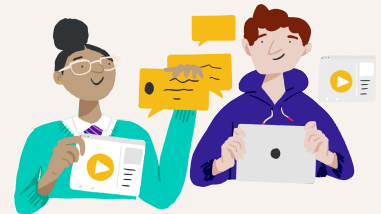

For tutors

new ways to work &
earn more flexibly

For learners

More ways MyT can
support them, when
they need it

A tutor-powered learning hub

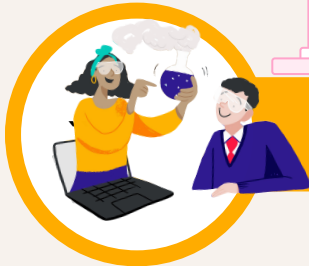

Built on a deep understanding of our learners' needs

Connecting home and school learning

Life-changing learning for all

Supported by a healthy 1:1 tutoring business

Product Strategy

The background is a dark charcoal gray. In the bottom-left corner, there is an orange geometric shape composed of several overlapping polygons, some of which contain thin red lines. In the top-right corner, there is a teal-colored shape, also composed of overlapping polygons, with thin white lines forming a grid-like pattern within it.

Radical Focus

VISION

Life-changing learning for all

STRATEGY

Efficient growth

Explore strategic growth bets, increasing meaningfully the number of learners we reach

Learner products

MyTutor

Our recommendation

Grade accelerator

Goal: Get a B+ in AQA GCSE Physics

What's included

- Weekly study session: Work with your matched tutor to review specific concepts and exam preparation techniques.
- Weekly group study session: Meet together with other high-achieving learners with similar exam goals to get an introduction to higher-level content.
- Next steps plan: Talk to your tutor about educational and career aspirations.
- Unlimited access to resources: Access a variety of resources that go beyond the highest-level content in GCSE and A-level physics, at a pace that suits you.

£150 / month

Squad priorities

B2C

Working on two streams of work, supporting CRO and building new consumer facing memberships experience.

Tutor membership experience

Building membership focused tutor experience and taking on matching

Membership Platform

Membership mechanics, payment integration, services for parent and tutor platform interactions including messaging.

Ladybird

Expanding remit to include building the Parent experience for managing their membership and seeing how it's valuable, adjusting focus of why we gather data on a learner (to tailor their experience to drive retention)

Learning Products

Adjust focus to retention on memberships by prioritising learning products that increase retention and add value to a membership proposition

B2B

Expanded remit to include ongoing maintenance of tutor onboarding experience, alongside the B2B roadmap for driving & demonstrating impact

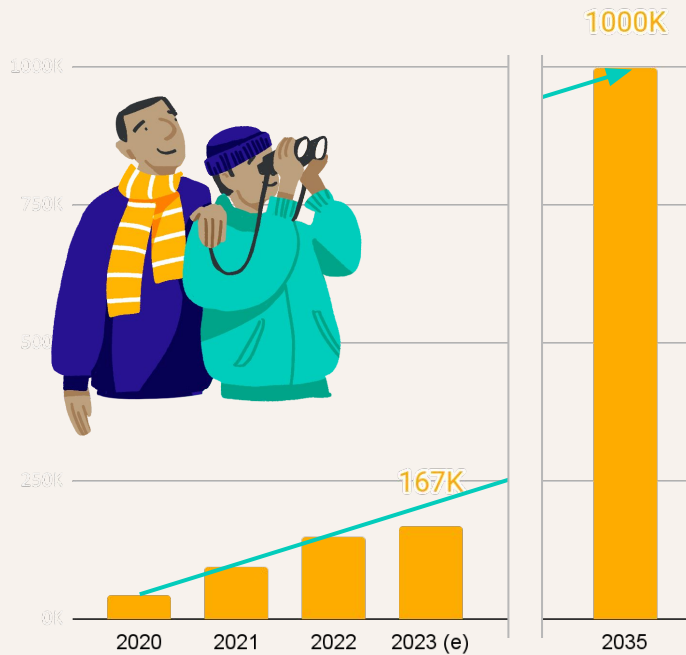

Measuring progress (Refining our North Star)

What got us here won't get us where we're going next

We're taking a more radical approach to:

- *Reach new learners, more cost effectively*
- *Help them to fill those gaps and reach their potential*

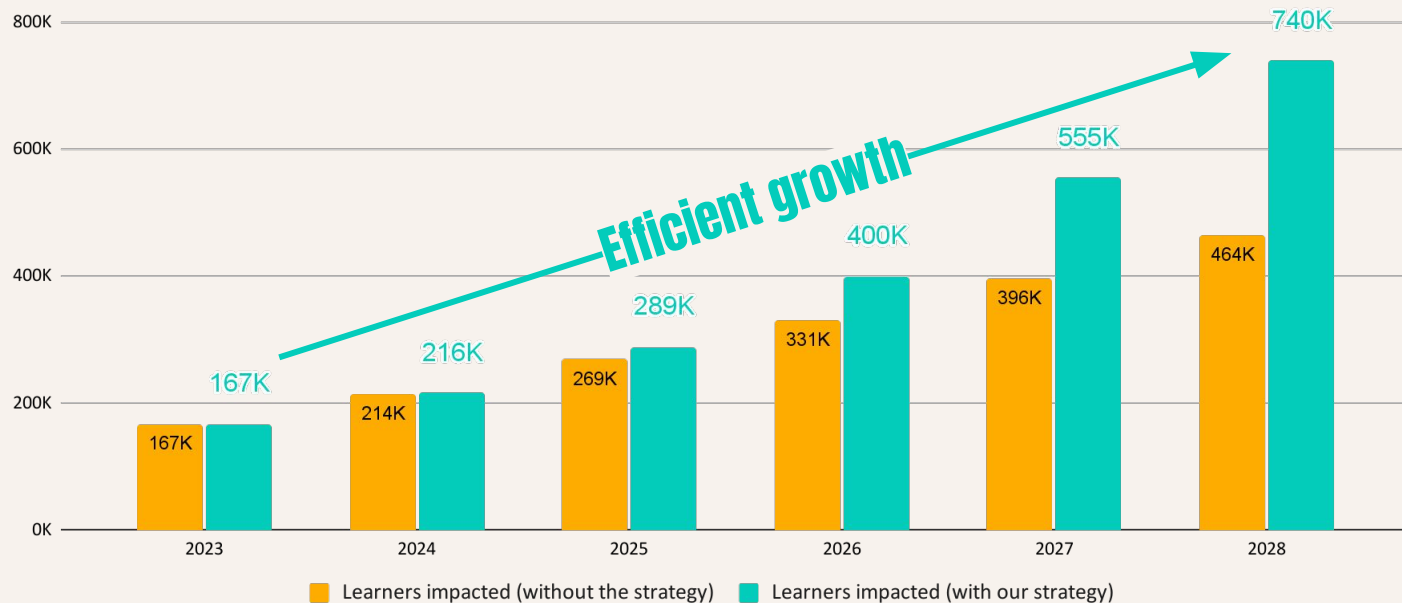

*Without this, we'd be **12 years away** from impacting 1 million lives.*

Learners lives impacted at our current trajectory ...

Reaching more learners, faster

Our strategy sets us for 1 million learners impacted in 2029

Learners impacted, refining our North Star ✨

Putting the learner first

Focusing on learners; tracking tutor impact in other ways

Capturing different learning experiences

All learning activity will be mapped to “tutor-equivalent hours” as our baseline.

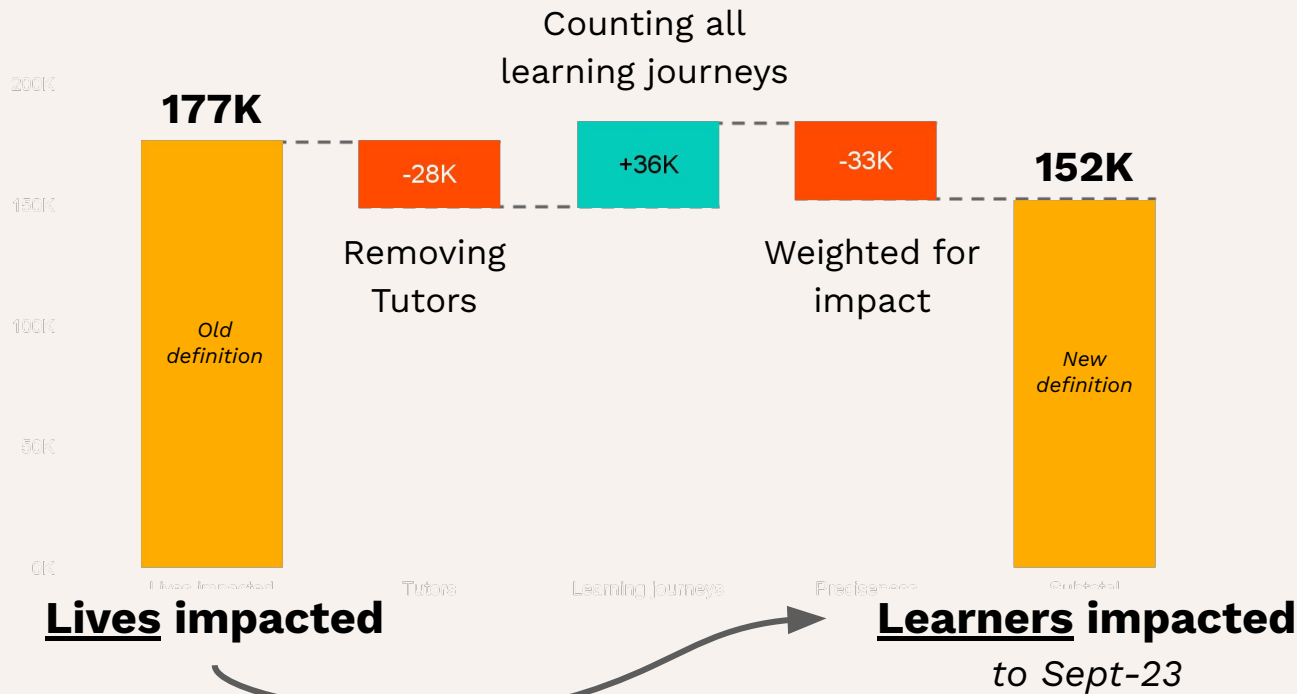

Measuring different learning journeys

Reflecting our goal to support learners for multiple subjects and multiple years

We'll continue refining how we measure impact as we learn more ...

Impact of the refined North Star definition

United behind the same goal
